Dr Ashok Khosla founded Development Alternatives in 1982 and currently chairs its Governing Council. Development Alternatives remains one of the world’s premier social enterprises, and now has a staff complement of 600. Its primary strategies are to design and deliver innovative ideas, technologies, and institutions that can quickly and successfully remove poverty and regenerate the health of the environment and its resources. He has several international positions that provide effective platforms for advocating appropriate policies and institutions on a national and global scale. He is the president of the International Union for Conservation of Nature (IUCN), the world’s oldest and largest environmental science network and also president of the Club of Rome, the pre-eminent think-tank on systems solutions for today’s global problems. He is also the co-chair of UNEP-International Resource Panel.
