

ATTAINING ENERGY, WATER, AND FOOD SECURITY FOR ALL

14th DELHI SUSTAINABLE DEVELOPMENT SUMMIT

6-8 February 2014 | New Delhi, India

Glimpses of DSDS 2013 - The Global Challenge of Resource-Efficient Growth and Development

DSDS 2014

The Energy and Resources Institute (TERI), a global think-tank established in 1974, is deeply committed to formulating strategies and solutions for critical issues related to energy and environment. TERI annually hosts the Delhi Sustainable Development Summit (DSDS), a major forum for the convergence of world leaders and thinkers dealing with issues of sustainability.

Special Features

- ◆ 10th Sustainable Development Leadership Award
- ◆ Exhibition: *Innovations for a Secure Future*
- ◆ Parallel Thematic Tracks
- ◆ Media Colloquium
- ◆ Film Festival
- ◆ Special Events
- ◆ World CEO Sustainability Summit (WCSS)

The human condition in the future would depend increasingly on how we are able to visualize and quantify some of the threats that we are likely to witness in the supply of energy, water, and food, because it is only then that measures can be taken in hand early. DSDS 2014 will deliberate on myriad aspects to devise adaptation measures and evolve new knowledge and technological solutions by which security can be enhanced and the risks of negative changes can be reduced.

Dr R K Pachauri, Director-General, TERI

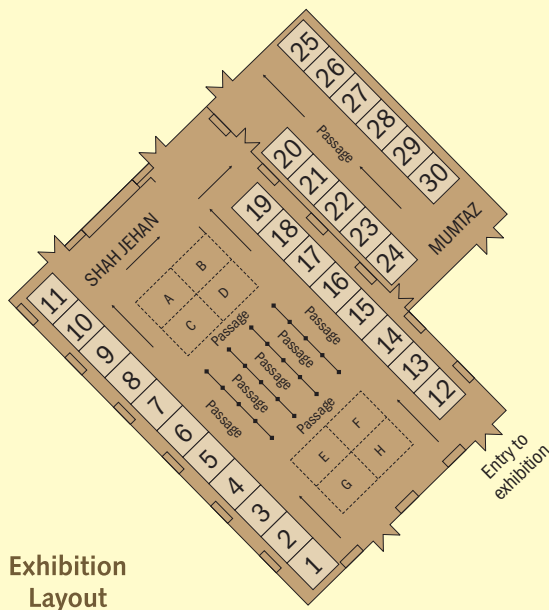

Exhibition: *Innovations for a Secure Future*

DSDS 2014 will host a special exhibition of innovations and technologies that can bring us closer to the goal of *Attaining Energy, Water and Food Security for All*.

The *Innovations for a Secure Future* Exhibition will provide an excellent platform for exhibitors from across the world to demonstrate and showcase their environment-friendly technologies, innovations, products and services. It is of supreme importance that individuals and institutions collectively adopt clean technologies and practices on a significantly larger scale. This Exhibition aims at not only generating more awareness; but also promoting and encouraging the adoption of cleaner technologies.

DSDS 2014 invites entrepreneurs, corporates, research and academic institutions and grassroots organizations to showcase their innovations and technologies to an august gathering at this special Exhibition.

**Exhibition

The DSDS 2014 Masthead

The Warli tribe resides in the mountainous and coastal areas of the Indian provinces of Maharashtra and Gujarat. The tribe is renowned for its wall paintings, which employ simple shapes – circles, triangles and squares – to depict myriad aspects of day to day life. The paintings also represent their perception of nature. The circle represents the sun and the moon, while the triangle is inspired from the mountains and trees. The DSDS 2014 masthead draws inspiration from this ancient art form of India which survives to date and underlines the basic connection the human race shares with its habitat.
