

## **Agostinho Miguel**

Agostinho Miguel has more than 15 years of technical experience developing, designing and constructing solar power plants (PV and CSP) as well as solar thermal and PV equipment, though his knowledge and experience also spans almost all Renewable Energies as well as Energy Efficiency. He has experience across all continents and more than 20 countries, including consultancy on solar for investors, banks, EPC companies, governments, multi-lateral development institutions and solar manufacturers. Additionally, he is an expert in solar parks development in India and South Africa. Miguel has professional experience at Siemens, AoSol, Ausra (acquired by Areva Solar) and SunBD, which he co-founded in 2009. He has a Masters in Physics Engineering and thesis on solar power from Instituto Superior Técnico in Portugal obtained in 2000.
