

## **Jurgen Hannak**

Jurgen Hannak is a senior project manager at adelphi providing leadership in the topic areas of sustainability management and resource efficiency. He has over 25 years of experience working both domestically and abroad. With a doctoral degree in social sciences and economics, he is an expert in the design, implementation and evaluation of international initiatives in technical collaboration for multi and bilateral development organisations, the European Commission and the private sector.

His work focuses on the development and implementation of sectoral sustainability strategies and the improvement of sustainability management in industrial zones. In addition to the moderation of stakeholder consultation processes for the formulation of approaches, policies and strategies, he supports efforts to strengthen competencies and systems in industrial associations in the preparation and integration of long-term sustainability roadmaps.

Prior to joining adelphi, Jürgen worked as a consultant and staff member for multi- and bilateral development organisations such as the United Nations Industrial Development Organization (UNIDO), the Deutschen Gesellschaft für Internationale Zusammenarbeit (GIZ), as well as various consulting agencies. His career has included long and short-term assignments and stays in Africa, Asia, and Latin America, with a regional focus on South and Southeast Asia.
