1630 – 1700 hrs	Q & A's
1700 – 1730 hrs	Networking tea

**Background on DSDS 2015:**

The year 2015 is significant, because the UN General Assembly (UNGA) is expected to arrive at a set of Sustainable Development Goals (SDGs) for the global community as a whole. DSDS 2015 would, therefore, provide a unique platform by which the outputs of the Summit can be provided to the UNGA in defining and arriving at a set of SDGs, which should be consistent with the MDGs that the UN has been following over the past decade and more. The 21st Conference of the Parties (CoP) under the UN Framework Convention on Climate Change will be held in France at the end of 2015, and it is expected that a global agreement on climate change would be finalized at this CoP. Hence, 2015 would witness major initiatives in setting the SDGs as well as dealing with climate change.

The 2013 edition of the Summit witnessed the introduction of Thematic Tracks; these tracks in addition to the Summit plenaries allow for discussions of considerable depth and detail on select themes. The DSDS 2015 thematic tracks will be populated by domain experts and practitioners; addressing important global issues.
