

Ravi Srivastava

Ravi Srivastava leads the Environment, Science and Technology unit in the Economic section of the U.S. Embassy, New Delhi. This team facilitates United States – India cooperation in the areas of environment, science, technology, and space. He previously served at U.S. Consulates in Chennai, India and Karachi, Pakistan, and at U.S. Embassies in Pretoria, South Africa and New Delhi, India. He studied civil engineering at IIT Madras, environmental engineering at Iowa State University (MS) and University of Illinois at Urbana-Champaign (Ph.D.), and management at Colorado State University (MBA). For nearly thirty-five years he has been learning about water quantity, quality, treatment, and management issues.
