

Youth Pledge as part of Youth Climate Conclave (YCC) 2025

(March 02 – 04, 2025)

We, the representatives of the Youth Climate Conclave, recognize that we have an important role to play in supporting a cleaner and greener environment. As future leaders, innovators, and citizens of the world, we are committed to taking bold, sustained, and transformative actions to protect our planet.

With aspirations in minds and passion in our hearts,

We pledge to spread awareness about causes and impacts of climate change, thereby fostering a deep understanding and advocating for climate resilience.

We pledge to invest time and resources in supporting intergenerational dialogues, hence supporting local solutions and transfer of community-based values.

We pledge to adopt eco-friendly practices, thereby reducing waste, conserving energy, minimizing carbon footprints, and making environmentally conscious choices in the lines of Government of India's Mission LiFE.

We pledge to use our voices to advocate for effective, and equitable policies in support of global, national, and local initiatives that pave way for climate action.

While we are aware about disproportionate impacts of climate change, **we pledge** to support actions that promote climate justice, equity, and inclusivity, ensuring no one is left behind in the united approach for a sustainable future.

We are committed to taking colossal steps to:

- **Innovate for the future**
- **Connecting the global aspirations with local actions**
- **Imbibe circular behaviour**

and will strive to continually learn, adapt, and enhance our commitments towards climate action through honing green skills and judicious use of new-age technologies.

We the youth of today and leaders of tomorrow,

Pledge to act with urgency and dedication, while adopting value-based approach to ensure a livable and thriving world for current and future generations.

The time to change and support united solutions to address the environmental polycrisis is now!
